and the public sector, and the implications of this for the delivery of health care services.

It is the third of these issues that is the focus of this article. In particular, we will examine the implications of the new arrangements for the delivery of health care services.

It is important to note that the new arrangements are not unique to the United Kingdom. In the United States, the introduction of managed care has led to a similar shift in the delivery of health care services.

However, the introduction of managed care in the United States has been accompanied by a significant increase in the number of uninsured individuals, and this has led to concerns about the sustainability of the health care system.
